SKYTROFA Cartridge
Contains medicine and water for injection. If refrigerated, leave it at room temperature for 15 minutes before use

Battery Icon

Constant green	Flashing green	Flashing orange
➡ Battery is fully charged ➡ The SKYTROFA Auto-Injector is ready to use	➡ At least 1 injection remaining, but charging recommended after use	➡ Battery needs charging
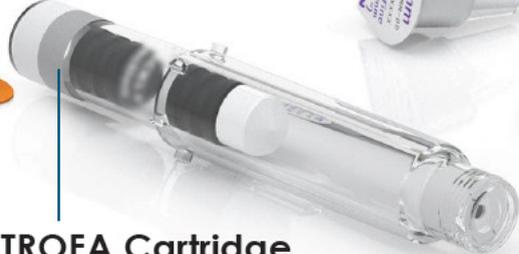

Prepare

1   Check and assemble cartridge and needle

1.1
Check expiration date and cartridge dose on cartridge pack. If refrigerated, allow **15** minutes to reach room temperature.

Expiration date
YYYY - MM
year month

Cartridge dose

Skytrofa. 5.2 mg

1.2
Check expiration date on needle.

Expiration date
YYYY - MM - DD
year month day
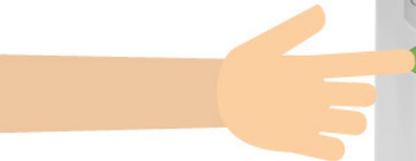

Remove paper from needle.

1.3
Screw needle straight and tightly on cartridge. **Do not** remove needle cover.

2   Turn on the auto-injector

Press and release the green button to turn on the auto-injector.

(You will hear **2** loud beeps. Battery icon 🔋 will light up and green top will start flashing)

3   Insert cartridge with attached needle

3.1
Needle
Cartridge

Push down cartridge **with attached needle** into flashing green top.

3.2
Click cartridge in place.

click

(Green top will stop flashing, mixing icon 🔄 will light up, and battery icon will switch off)

3.3
After click, remove finger from cartridge.

Mix

4   Wait while mixing

Wait 4 to 8 minutes for the auto-injector to mix medicine.

Watch progress bar gradually light up.

Wait 4 to 8 minutes

Wait until you hear **2** loud beeps and the entire progress bar flashes.

If your auto-injector turns off automatically read Instructions for Use
➡ IFU page 60.

5   Turn the auto-injector up and down

Tick

Turn the auto-injector up and down, **listening** for a tick sound each up and down cycle to make sure the turns are correct. **Turn up and down correctly** 5 to 10 times until you hear **2 loud beeps** and the whole progress bar, except the top element, lights up.
Do not press the green button.
If you see a flashing orange mixing icon read ➡ IFU page 58.

6   Finish mixing

6.1

Keep the auto-injector upright on a flat surface until you hear **2** loud beeps and the entire progress bar lights up.

6.2

Pull off needle cover.

Do not twist needle cover off.

Keep needle cover for later.
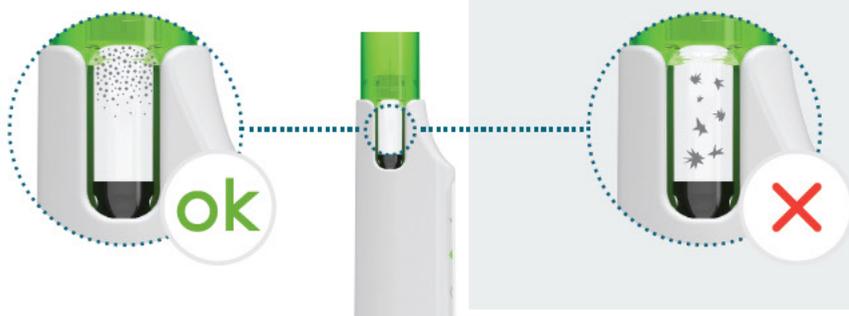

(Eye icon 👁 will light up)

Inject

7 Check mixed medicine

Medicine is ok to use if it is colorless and clear. It may contain air bubbles. This is normal. Go to Step 8.

**Do not** use the mixed medicine if it has visible particles. Press the green button for **8** seconds and go to Step 10.

ok

✗

8 Prepare for injection

8.1

Choose an injection site: Stomach (abdomen), thighs, or buttocks. Change the injection site for every injection.

Front   Back
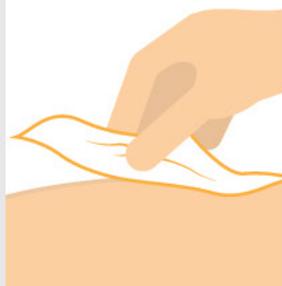

Stomach (abdomen) Thighs   Buttocks

8.2

Make sure your hands are clean using soap and water or hand sanitizer.

8.3

Clean injection site with alcohol wipe. **Do not** inject through clothes.

9 Inject medicine

9.1

Press and hold green top against the injection site for **10 to 20** seconds until you hear **2** loud beeps.

(Green top will flash **2** times and check mark icon ✓ will light up)

9.2

Remove the auto-injector from skin and wait until you hear **2** loud beeps.
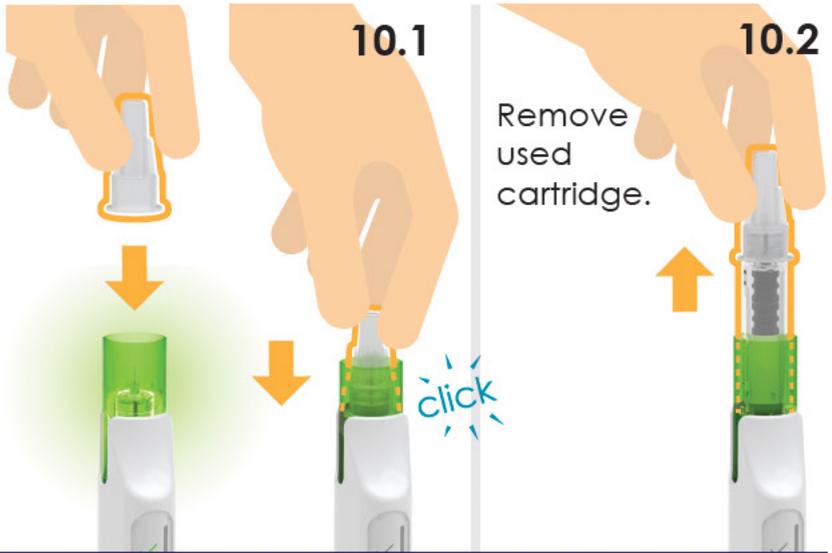

(Green top will start flashing)

bzzz

After injection

10 Remove cartridge

Press down the needle cover into the flashing green top until you **hear** a click to remove the cartridge.

10.1

click

10.2

Remove used cartridge.

11 Check cartridge and throw away

Check that cartridge is empty.

Put used cartridge and needle in a sharps disposal container.

(More info:
➡ IFU page 46)

**Does your weekly dose require 2 cartridges?**

Then take the second injection by repeating Step 1 to Step 11 with a new cartridge and needle before continuing to Step 12.

12 Store the auto-injector

Put on the protective cover.

It is recommended to store the auto-injector at room temperature between 59°F to 86°F (15°C to 30°C), to be ready for next use.
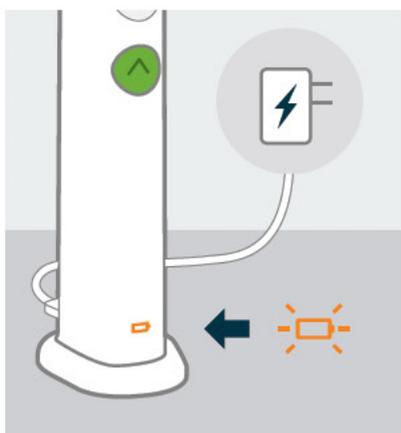

Quick troubleshooting

For all troubleshooting cases and details, see Instructions for Use (IFU)

▶ IFU page 52
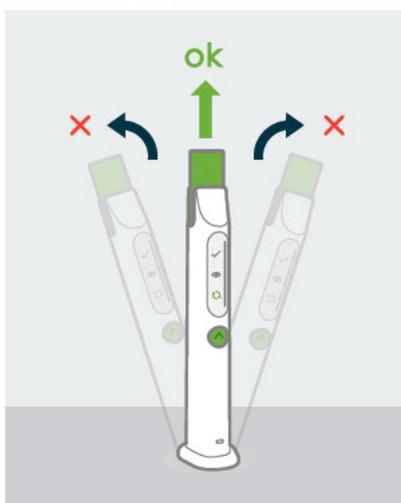

Charging required (Step 2)
▶ IFU page 57

If the battery level is low:

You will see a flashing orange battery icon.

Do this: Insert charging cable into the SKYTROFA Auto-Injector at rear lower side and connect to a power outlet.

## SKYTROFA Auto-Injector not upright (Step 4 and 6.1)
▶ IFU page 54

ok

If the SKYTROFA Auto-Injector is not in an upright position during mixing and air removal:

You will hear a repeating notification sound. Mixing icon will flash slowly and progress bar will freeze.

Do this: Place the SKYTROFA Auto-Injector in an upright position and the mixing or air removal will continue.

Skin contact lost (Step 9)
▶ IFU page 55
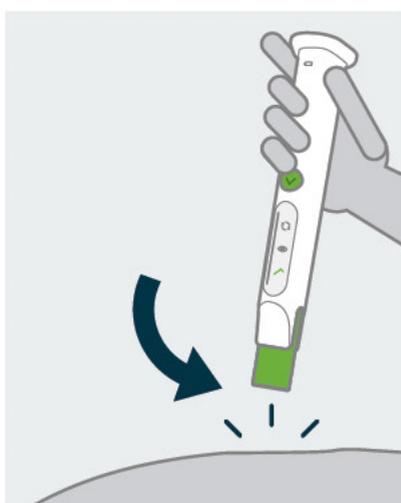

If the green top is removed from skin before the injection is complete:

You will hear a repeating notification sound. Check mark icon will flash slowly and progress bar will freeze.

Do this: Press green top against skin and the injection will continue.
